research strengths

philosophy of science
philosophy of mind
philosophy of cognitive sciences
philosophy of biology
moral psychology
ethics and bioethics

placement

80% of our graduates from the past decade are employed in academic positions. 3/4 of those are permanent positions (tenure track or equivalent), with the remaining 1/4 graduating in 2015 or later.

two phd tracks

The **traditional track** provides a curriculum similar to most other Philosophy PhD programs. Traditional track students regularly engage with other disciplines, including law, politics, history, and women's, gender and sexuality studies.

The **sciences track** pairs a deep grounding in philosophy with rigorous training in scientific disciplines, preparing graduates for a range of philosophy and interdisciplinary jobs. Sciences track students can earn an MS in their scientific field while working on the PhD.

cincinnati

The **University of Cincinnati** is a Carnegie R1 public research university with over 45,000 students located in Cincinnati, Ohio.

Cincinnati is a metropolitan area with a population of over 2 million people. The city has vibrant arts, dining, and craft brewing cultures and is served by an international airport. The city is a headquarters for numerous national and international corporations. Cincinnati is in the US eastern time zone, less than five hours drive to Nashville, Pittsburgh, or Chicago.
