EU Perspectives is a seminar + study tour focused on undergraduate research on Europe and the European Union. In the past three years, the Greek crisis, the Brexit referendum, migration issues, and security crises have highlighted competing definitions of Europe. This seminar and study abroad program will examine European integration and resistance processes. Conducting your research, you will be able to investigate the impact of EU policies, agencies, and programs at the member state, regional, or local level, and observe what it is like to work, own a business, study, or raise a family in Europe.
