

Rolling Rocks

Today's Colloquium

Today's colloquium will be held at 3:30 pm in Braunstein 300. It will be given by Dr. Eric Carson (WI Geol Nat Hist Surv) and is titled: "The River That Flows Uphill: Late Cenozoic evolution of the lower Wisconsin River valley, stream piracy, and reorganization of North American mid-continent drainage systems". This will be followed by refreshments in the Rug Room.

New Paper

Burgette, R.J., Weldon, R.J., Abdrakhmatov, K.Y., Ormukov, C. Owen, L.A. and Thompson, S.C. (2017). Timing and process of river and lake terrace formation in the Kyrgyz Tien Shan. *Quaternary Science Reviews*, 159,15-34.

SLOW WEEK? Please don't forget to send me your news.

Cheers,

Lewis
