

Rolling Rocks

Today's Colloquium

Today's colloquium will be held at 3:30 pm in Braunstein 201. The colloquium will be given by our very own Dr. Jeff Havig. His talk is titled: "Zombie mines and brian biofilms: acid mine drainage impact and implications for the Archean-Paleoproterozoic transition". This will be followed by refreshments in the Rug Room.

New Correspondence

Please check out the interesting correspondence that Josh has been involved in:

Lyons, S.K., **J.H. Miller**, K.L. Amatangelo, A.K. Behrensmeyer, A. Bercovici, J.L. Blois, M. Davis, W.A. DiMichele, A. Du, J.Y. Eronen, J.T. Faith, G.R. Graves, N. Judd, C. Labandeira, C.V. Looy, B. McGill, D. Patterson, S. Pineda-Munoz, R. Potts, B. Riddle, R.C. Terry, A. Toth, W. Ulrich, A. Villasenor, S. Wing, H. Anderson, J. Anderson, and N.J. Gotelli. (2016). Reply to How foreign is the past? *Nature*, 538, doi:10.1038/nature20097
