

## PROGRAM SUMMARY

The Certificate is geared towards graduate students, faculty members, & academic or community researchers who are interested in integrating community engagement into their research design. Graduates from the Certificate will obtain the skills & resources needed in order to conduct community-engaged research.

Topics will include:

- Overview of Community-Engaged Research for Health Equity
- Research Ethics
- Introductory Research Methods
- Research Dissemination
- Community Psychology
- Racism in Research
- Communicating Science to Public Audiences
