Archaeology

Archaeology majors develop research skills that enable them to investigate problems, analyze and evaluate data and infer aspects of ancient human behavior and modes of organization. Students learn about archaeological ethics, the history of archaeology, heritage management and the relevance of archaeology to contemporary society.

Three (3) Tracks Offered:

Geoarchaeology — focuses on the application of geo-scientific principles drawn from geophysics, sedimentology, soil science, and geochronology for understanding the origins, content variability, and the formation history of the archaeological record.

Landscape Archaeology — refers to the suite of archaeological and geo-spatial approaches for determining the degree to which humans have altered terrain and vegetation communities for economic, political and ideological reasons.

Social Complexity — the systematic and cross-cultural study of the factors (e.g., climatic, demographic, economic) that affect the trajectories of societies representing various organizational structures and sociocultural levels of complexity.

Examples of our unique degree possibilities

BA, minor in Classics w/ a certificate in Geographic Information Systems

BA, minor in History w/ a certificate in Ancient Greek

Popular Minors

- Anthropology
- Geology
- Geography

Popular Certificates

- Heritage Studies
- Historic Preservation

Special Opportunity for Archaeology majors

Rebekah Knaggs

Major: Archaeology

Minors: History, Classical Civilization

Certificate: Historic Preservation

Involvement: Arts & Sciences Ambassador, ROAR Tour Guide, UC Bearcat Marching Band, Tau Beta Sigma (National Honorary Band Sorority)

Opportunities: Internships with Cranbrook Institute of Science and Medina Bicentennial Committee, Field School Program through the Cleveland Museum of Natural History.

"Take advantage of all the opportunities that UC has to offer. Every internship, every experience that I've had came as a result of my willingness to ask, to be persistent and to talk to people (which resulted in many cool relationships across the UC campus with professors and staff members alike). If you want to be successful at UC, don't forget to network."

Future: Plan to attend graduate school and subsequently apply for opportunities in the National Park Services.
