Psychology

Psychology is the scientific study of the behavior of humans and other animals. Psychology majors develop strong research and analytical skills while exploring all phases of human life. Students of psychology are interested in conducting research to discover patterns of human behavior, as well as in applying psychological principles and techniques to solving social and individual problems.

Bachelor of Arts (BA) and Bachelor of Science (BS) degrees offered. What's the difference?

The BA may be more appropriate if you want to go directly into the workforce upon graduation or go on to graduate school and work as a therapist, school counselor, or focus on industrial, organizational or developmental psychology's applications.

The BS may be more appropriate if you intend to study neuroscience and behavior, or are interested in becoming a, psychiatrist or any medical aspect of psychology. It is also designed for students interested in pursuing a PhD degree and doing research.

Examples of our unique degree possibilities

BA, minor in Sociology w/ a certificate in Nonprofit & Community Leadership

BS, minor in Biology w/ a certificate in Organizational Leadership

Popular Minors

- Sociology
- Africana Studies
- Communication

Popular Certificates

- Organizational Leadership- Human Resources
- Bioethics, Pre-Medicine

Special Opportunities for Psychology majors

3 Year Program — students with Advanced Standing Credit or who attend during the summers may finish the degree in 3 years

3+3 Law Program — earn a Bachelors and law degree in just 6 years.

Study Abroad Opportunities

Opportunities to study abroad are available to students in all majors within the College of Arts & Sciences. Students may choose from different types of study abroad opportunities to include UC Faculty-Led Programs, Exchange Programs and External Programs. Top destinations include France, China, Spain, Germany, Italy, Canada, India, Mexico and the United Kingdom.

Career Possibilities

Clinical research or school psychology, mental health work, casework, marketing research, data analysis, college or university professor

Cool Classes

Brains on Drugs, Broken Brains, Lifespan Brain Development, Groups at Work, Interpersonal Relations

Anja Bosiljic

Majors: Psychology and Liberal Arts

Minor: Women, Gender, and Sexuality Studies

Certificates: Medical Humanities and Professional Communication

"The College of Arts and Sciences has provided me with many opportunities. I am an A&S ambassador and peer leader, I conduct research in two different labs, have held multiple TA positions, and am involved in Greek Life as my sorority's Director of Campus Activities. I have also had the chance to study abroad in Greece and have participated in multiple service-learning projects. Being so active on campus, I feel as though I am much more prepared for the 'real world' in terms of pursuing a career. Upon graduation, I am interested in Industrial-Organizational Psychology and thanks to the 4+1 program offered at UC, I may be able to complete a Master's program in one year rather than two and continue my time at the College."
